

DTK-APK1

Alarm System Power And Dialer Surge Protection General Product Specifications

DTK-APK1

DITEK's APK1 Alarm Protection Kit is designed for residential alarm system installers. The self-resetting products are designed for systems where the telco ground is at the alarm panel.

The 1F AC one outlet surge protector has a unique center screw that allows secure fastening of alarm panel transformers. The MRJ31XSCPWP uses standard RJ31X plug connectors and protects the alarm dialer lines.

Product Description

DTK-APK1

- 1F Single Outlet AC Surge Protector
 - Provides AC power protection for alarm transformer
 - Center screw securely fastens Class II transformers to the outlet fixture, eliminating accidental power loss
 - Diagnostic indicator confirms ground presence, unit function, and AC power
