

The 8500 series is a fire rated, compact, high performance electric strike featuring a unique concealed design for use with mortise locksets without a deadbolt. Designed for fast, convenient installation, the 8500 installs with little or no modification to the frame. Simply remove the existing strike plate, remove the dust box and install. Its strength is derived from a unique keeper pin locking design, enabling the 8500 to exceed Grade-1 ratings. This unique electric strike complies with NFPA 80-07 guidelines for retrofit into fire-rated frames. The 8500 accommodates mortise latchbolts up to 3/4" throw.

# **8500** Series

# The fire-rated, concealed electric strike solution for mortise locksets

# **Specifications**

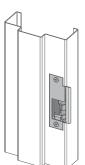

- UL 10C-fire-rated, 3 hour single-door fire (fail secure only)
- CAN4-S104 (ULC-S104) fire door conformant
- NFPA 80-07 Compliant
- UL 1034 burglaryresistant listed and suitable for outdoor use
- ANSI/BHMA A156.31, Grade 1
- NFPA -252 fire door conformant
- ASTM-E152 fire door conformant
- Patent: 5,934,720

# Frame Application

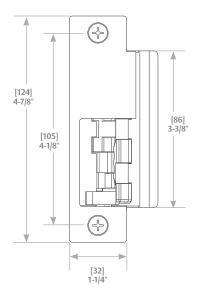

- Metal
- Wood

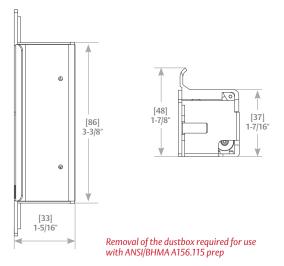

#### **Electrical**

- .24 Amps @ 12 VDC/VAC
- .12 Amps @ 24VDC/VAC
- DC continuous duty/AC intermittent duty only

43

#### **Standard Features**

- No cutting to the face of the frame
- Stainless steel construction
- Tamper resistant
- Static strength 1,500 lbs.
- Dynamic strength 70 ft-lbs.
- Endurance 500,000 cycles
- Field selectable fail safe/fail secure
- Dual voltage 12 or 24 VDC/VAC
- Non-handed
- Metal or wood frame
- Internally mounted solenoid
- Accommodates 3/4" mortise latchbolts

- Strike body depth 1-5/16"
- · Plug-in connector
- Full pocket shims for horizontal adjustment
- Five-year limited warranty

# **Optional Features**

- LBM » Latchbolt Monitor
- LBSM » Latchbolt Strike Monitor
- 4 faceplate option kits to work with most mortise locksets, see page 42

### **Accessories**

150 » Strike latch guard

2001M » Plug-in bridge rectifier

2004M » ElectroLynx® adapter

2005M3 » SMART Pac® III

2006M » Plug-in buzzer

#### **Finishes**

630 » Satin stainless steel

605 » Bright brass

606 » Satin brass

612 » Satin bronze

613 » Bronze toned

629 » Bright stainless steel

GRADE 1

# **8500 Series** Faceplate Option Kits

The 8500 faceplate options kits combine two different faceplate pocket styles with three different deadlatch platform profiles for compatibility with a wide variety of mortise locksets. HES 8500 faceplate option kits

are lock specific. There are two faceplates included in each kit: a standard faceplate and a faceplate with a wider pocket to address less-than-ideal sagging door conditions.

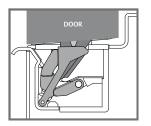

# Get to Know the **HES 8500**

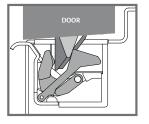

The HES 8500 concealed electric strike for mortise locksets builds on the tradition of ground-breaking design you've come to know in the 8000 series concealed electric strike family. It has a unique design unlike

any electric strike on the market today. It's important to understand the extraordinary design of the 8500, so that you can correctly install and operate it.

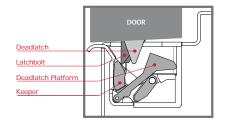

When the door is closed, the mortise latchbolt is held secure by the 8500 keeper. A 'deadlatch platform' insert holds the deadlatch in its locked state. Place the deadlatch platform into one of three locations in the strike as appropriate for the type of mortise lockset.

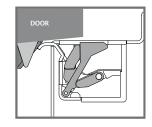

When the electric strike is energized, the keeper begins to rotate and the deadlatch platform falls away, allowing the deadlatch to drop and the latchbolt to become unguarded.

As the door moves forward, the latchbolt slides first along the keeper and then up the internal ramp.

As the door continues along its arc away from the frame, the latchbolt and deadlatch exit the 8500, which quickly returns to its locked state.
