TX3 **Voice & Card Access** Control

Simplifying Access Control

The TX3 Voice Entry and Card Access Integrated System delivers performance and value in any configuration. From small apartment/condos to large commercial applications, the TX3 integrated system is ready with the most extensive list of features available:

• Rugged auto-dial entry panels with an array of indoor/outdoor and surface/flush configurations

• Optional NSL (no phone bill) telephone wiring

• Expandable elevator control (up to 96 relays per controller)

• Expandable, full featured, platform that integrates a full access control system using both TCP/IP and RS-485

• Optional gate control with wireless transmitters

The TX3 is the expandable and scalable solution for your business.
